---

## **PROJECTS**

### **The Space Place**

- We created an app that displays a list of astronomical objects that allows users to do an image search and use wikipedia for a description of what the object means. The idea of using wikipedia is to have the users have more info about the images we use. Weather Dashboard

### **Weather App**

- I created a weather application with search functionality to find current weather conditions and the future weather outlook for multiple cities.
- 

## **EXPERIENCE**

**Electrician            May 2012 – Present**

- Lead cross-trained teams of 4-10 personnel ensuring 100% on-time completion of preventive maintenance of electrical equipment to allow the ship to get underway.
- Supervised 50 sailors as section leader.
